Teaching/learning methods

Teaching, learning and assessment activities are aligned to ensure the objectives of the programme are clearly defined and that students have the opportunities to achieve these

Assessment

The range of assessment strategies deployed on this course have been selected and managed to promote deep and effective learning, leading directly to an improved understanding and application of learning. All assessment tasks are aligned to the learning outcomes and will monitor integrative and extended understanding of the subjects. Assessment is in line with current RVC Assessment and Award Regulations.

Formative assessment activities are designed to enable students to assess their progress and help them identify and plan the continuation of their project and further learning activities. Dialogue between the student and their supervisor, academic tutor and peers via formative assessment and discussion, provides individualised feedback, to help reinforce good practice and importantly, help show where and how improvements can be made.

Summative assessments are used at the end of placement year to ensure that students have achieved the Learning Outcomes.
