Email: fapd@rvc.ac.uk

RVC-FARM ANIMAL PATHOLOGY AND DIAGNOSTICS (FAPD)

1. Who are we and what do we do?

RVC-FAPD is a recognised third party expert Post Mortem Examination (PME) provider for APHA. We carry out post mortem examinations on <u>all farmed animal species</u> for a subsidised fee if the carcass is suitable for surveillance purposes and a non-subsidised fee if it is not suitable for surveillance purposes. Our group consists of specialised veterinary pathologists, pathology residents and former Veterinary Investigation Officers with longstanding veterinary farm animal experience in the UK. The most likely veterinary staff members you will talk to include Dr Sonja Jeckel and Bernat Marti Garcia.
